and interact with the current DC Community Health Needs Assessment (CHNA), a comprehensive, online microsite that describes the District's health status and context around residents' lived experiences.

District of Columbia Community Health Needs Assessment | doh

The focus groups were conducted in the context of an exploratory model (Becker et al., 1992) used in prior needs assessments with ethnic minorities. This framework aids in collecting qualitative information about the experiences, opinions, preferences, and attitudes of the target group and helps to develop hypotheses, although they are not necessarily generalizable.
