Breast or formula milk should be their main source of nutrition until after six months old. • Babies weaned too early may gain excess weight, and may develop allergies and intolerances to some foods. • Babies who are weaned at around six months should progress more quickly from smooth to lumpier textures.

Weaning - NHS Grampian

Full fat cows milk products can be used in weaning after 6 months (e.g. yoghurt, custard, cheese sauce). 500-600ml breast milk, infant milk or follow-on milk daily. Can also use full fat cows milk to mix solids. Hard cheese can be cubed or grated & used as 'finger food'. Bread, cereal, rice, pasta and potatoes.

6 months 12 months - NHS Grampian

Introducing your baby to solid foods, also referred to as weaning or complementary feeding, starts when your baby is around 6 months old. Your baby should be introduced to a varied diet, alongside their usual breast milk or first infant formula. It can be confusing knowing when and how to start introducing solid foods.
