Gina: Freshly brewed tea. Earl Grey, loose leaf. Rain on the windowsills. The smell of library books. Escape into worlds greater than this. Solitude. Invisibility. A quiet life. Maybe boring, but boring was never dangerous. Until I saw what I was missing out on. Who I was missing out on. The man who shattered my boring, safe life and lay it to ruin. The man I'd been in love with since I was a teenager. Who I'd been invisible to since I was a teenager. The man who just happened to be a world-famous rock star. Sam: Whisky. Neat. Leave the bottle. Crowd of hundreds of people. No, make it thousands. All shouting my name. Live fast. Die... Die? I'm too young, too famous and far too badass to die. Death doesn't happen when you stop breathing, it's what happens before that. Death is the monotony of life. The grave? Well, all the greats live there. You're not a rock star until you die before you're thirty. The grave doesn't bother me. Just the quiet. That is death in the life of rock. But then... her. She'd been there all along and I'd been too blind, too obsessed with the fast, loud life to realize where the real Nirvana lay. In the silence. Even the grave couldn't hold me if I didn't get her. And I'm a rock star. And a badass. And as stubborn as I am good-looking. I know how to get what I want. I also know how to kill anyone who gets in my way.

A book about management, described by guru Peter Drucker as 'a first rate as an introduction for the non-manager and especially for the beginner, but equally excellent as a rounded, complete, and comprehensive `refresher course' for the most experienced executive.' Both a beginner's guide and a bible for one of the greatest social innovations of modern times: the discipline of management. Leading business editor Joan Magretta distils the wisdom of a bewildering sea of books and articles into one simple, clear volume, explaining both the logic of successful organisations and how that logic is embodied in practice by management. Newcomers will find the basics demystified. More experienced managers will recognise a store of useful wisdom and a framework for improving their own performance. In general, the book defines a common standard of managerial literacy that will help all of us to lead more effectively.

The Art of Ducati Limited Edition

Celebrate more than 60 years of Italian motorcycle mastery, in an elegant slipcase. Over 60 years ago in Bologna, Italy, a small company called Ducati began manufacturing simple, inexpensive 50cc motorcycles—really no more than two-stroke-powered bicycles. Since then, Ducati has evolved into one of the most storied names in the motorcycling world, its lineup of beautiful machines revered for their technical excellence and extreme performance. In The Art of Ducati, Ducati expert Ian Falloon teams with renowned British photographer James Mann to present a gorgeously illustrated, wonderfully curated review of more than six decades of Ducati excitement. From the single-cylinder bikes of the 1950s and 1960s to the bevel-drive twins of the 1970s and early 1980s to the high-performance bikes of the 21st century, The Art of Ducati showcases a motorcycle marque that has never rested on its laurels. Ducati's style and technology have constantly evolved, engineering timeless classics like the 900SS, Darmah, Mike Hailwood Replica, 851, 916, Monster, and ST sports touring series, bikes that laid the foundation for today's cutting-edge models: the Panigale superbike, Multistrada adventure bike, all-new Monster, Hypermotard, and Diavel power cruiser. While there's no end in sight for Ducati's dominance, The Art of Ducati pays homage to their past six-plus decades of masterful motorcycle engineering. This deluxe, slipcased numbered edition is perfect as a gift for the Ducati aficionado.

Proven principles for sustainable success, with new leadership insight PEAK is the popular, transformative guide to doing business better, written by a seasoned entrepreneur/CEO who has disrupted his favorite industry not once, but twice. Author Chip Conley, founder and former CEO of one of the world's largest boutique hotel companies, turned to psychologist Abraham Maslow's Hierarchy of Needs at a time when his company was in dire need. And years later, when the young founders of Airbnb asked him to help turn their start-up home sharing company into a world-class hospitality giant, Conley once again used the principles he'd developed in PEAK. In the decade since this book's first edition, Conley's PEAK strategy has been developed on six continents in organizations in virtually every industry. The author's foundational premise is that great leaders become amateur psychologists by understanding the unique needs of three key relationships—with employees, customers, and investors—and this message has resonated with every kind of leader and company including some of the world's best-known, from Apple to Facebook. Avid users of PEAK have found that the principles create greater loyalty and differentiation with their key stakeholders. This new second edition includes in-depth examples of real-world PEAK companies, including the author's own at Airbnb, and exclusive PEAK leadership practices that will take you—and your company's performance—to new heights. Whether you're at a startup or a Fortune 500 company, at a for-profit, nonprofit, or governmental organization, this book can help you and your people reach potential you never realized you had. Understand how Maslow's hierarchy makes for winning business practices Learn how PEAK drove some of today's top businesses to success Help employees reach their full potential—and beyond Transform the customer experience and keep investors happy The PEAK framework succeeds because it elevates the business from the inside out. These same principles apply in the boardroom, the breakroom, and your living room at home, and have proven to be the foundation of healthy, fulfilled lives. Even if you think you're doing great, you could always be doing better—and PEAK gives you a roadmap to the next level.

How To Shift Your Company Beyond Being Transactional to Truly Transform and Even Transcend Business...Forever Evolved Enterprise is an illustrated journey for 21st century entrepreneurs ready to explore how greater purpose, joy and meaningful impact create fierce brand loyalty, marketplace leadership and deliver exceptional profits.

Hawk's Woman

The study of origin and domestication of legumes described in this book emerged when it became apparent that while this kind of information is adequate for cereals, the pulses lagged behind. At the end of the 1960s the senior author initiated a study on the chickpea's wild relatives followed by similar attempts for broad bean, fenugreek, common vetch, bitter vetch, and lentil. The junior author joined the project in the late 1980s with a study of the genetics of interspecific hybrid embryo abortion in lentil and later has extensively investigated chickpea domestication and wild peas. While this book mainly describes our research findings, pertinent results obtained by others are also discussed and evaluated. Studying the wild relatives of legumes included evaluation of their taxonomic status, their morphological variation, ecological requirements, exploration of their distribution, and seed collection in their natural habitats. Seeds were examined for their protein profile as preliminary hints of their affinity to the cultigens and plants grown from these seeds were used for establishing their karyotype, producing intra- and interspecific hybrids and analyses of their chromosome pairing at meiosis and fertility. The aim of these investigations was the identification of the potential wild gene pool of the domesticated forms. Assessment of genetic variation among accessions, particularly in the genus Lens, was made by isozymes and chloroplast DNA studies. The main findings include the discovery of the chickpea wild progenitor; studies of lentil in three crossability groups; wild peas proceeded in two lines of study; faba bean and fenugreek and their wild progenitors have not yet been identified; common vetch and its related form were treated here as an aggregate (*A. sativa*); we found gene flow between members of different karyotypes is possible; bitter vetch and its relation to the domesticated form were established by breeding experiments.

A handsome stranger almost makes up for a lost phone in a comedy of errors across New York City. Christy prides herself on her efficiency as a personal assistant, fueled by her ever-present iPhone. When she loses the phone on the train on the day of her sister's engagement party, Christy is sure the day is ruined—until she borrows a phone to reach Will, the cute guy who picked up hers for safe keeping. Dealing with family emergencies of his own, he can't meet her until the evening, but maybe there's still hope. Christy enlists Will as her own personal assistant, feeding her addresses and schedules throughout the day. Determined to meet the high expectations of her clients, not to mention the preparations for the engagement party, Christy dashes back and forth across New York City saving spoiled dogs from impatient groomers, shoving oriental rugs into too-small cabs, and carefully avoiding Twitter-obsessed socialites, all with Will's calming voice in her ear guiding the way. Juggling his own misadventures with his cantankerous father and his flighty assistant, Will begins counting the hours until he can be properly introduced to the woman who has drawn him in with nothing more than a sexy voice and an overly complicated phone.

The bestselling book, now with a new preface by the authors At once a bold defense and reimagining of capitalism and a blueprint for a new system for doing business, Conscious Capitalism is for anyone hoping to build a more cooperative, humane, and positive future. Whole Foods Market cofounder John Mackey and professor and Conscious Capitalism, Inc. cofounder Raj Sisodia argue that both business and capitalism are inherently good, and they use some of today's best-known and most successful companies to illustrate their point. From Southwest Airlines, UPS, and Tata to Costco, Panera, Google, the Container Store, and Amazon, today's organizations are creating value for all stakeholders—including customers, employees, suppliers, investors, society, and the environment. Read this book and you'll better understand how four specific tenets—higher purpose, stakeholder integration, conscious leadership, and conscious culture and management—can help build strong businesses, move capitalism closer to its highest potential, and foster a more positive environment for all of us.

Revolutionary essays on design, aesthetics and materialism - from one of the great masters of modern architecture Adolf Loos, the great Viennese pioneer of modern architecture, was a hater of the fake, the fussy and the lavishly decorated, and a lover of stripped down, clean simplicity. He was also a writer of effervescent, caustic wit, as shown in this selection of essays on all aspects of design and aesthetics, from cities to glassware, furniture to footwear, architectural training to why 'the lack of ornament is a sign of intellectual power'. Vespa and Lambretta remain the two most iconic motor scooter brands, even four decades after the latter's demise. But what made them such a European sensation in the postwar era? And why were they particularly popular in Britain in the 1950s and '60s? Motor scooter expert Stuart Owen explains the rise of Innocenti's Lambretta and Piaggio's Vespa, from the wartime ruins of Italy, through years of plenty as the two manufacturers exploited a ready market for affordable, economic transport, and then their decline into more uncertain times as motor cars trespassed on their success. He also explores the rich history of accessorising and customising the scooters, their essential role in the mod movement, and the revival in Vespa's fortunes following the release of the cult film Quadrophenia.
