The Author's Guide to Building an Online Platform shows the reader how to: Develop a high-traffic website, establish himself as an expert in his field, build a fan base with e-newsletters, blog for fame, and utilize tactics to gain visibility on Amazon.com and other online stores. This book addresses the growing academic concerns of the market-religion convergences in Asia. Bringing together a group of leading scholars from Asia, Europe, Australia and North America, it discusses multiple issues regarding religious commodifications and their consequences across Asia's diverse religious traditions. Covering key issues in the anthropology and sociology of contemporary Asian religion, it draws theoretical implications for the study of religions in the light of the shift of religious institutions from traditional religious beliefs to material prosperity. The fact that religions compete with each other in a 'market of faiths' is also at the core of the analysis. The contributions show how ordinary people and religious institutions in Asia adjusted to, and negotiated with, the penetrative forces of a global market economy into the region's changing religio-cultural landscapes. An excellent contribution to the growing demands of ethnographically and theoretically updated interpretations of Asian religions. Religious Commodifications in Asia will be of interest to scholars of Asian religion and new religious movements.

The Prosperous Justice Party (PKS) is the most interesting phenomenon in contemporary Indonesian politics. Not only is it gaining rapidly in membership and electoral support, it is also bringing a new and markedly different approach to Islamic politics, one which has no precedent in Indonesian history. Understanding PKS and analysing its political behaviour presents challenges to scholars and observers. This is partly due to the fact that the party represents a new trend within Indonesian Islam which has few parallels with preceding movements. Yon Machmudi has rendered us a valuable service. In this book, he provides a thoughtful and authoritative context for viewing PKS. He critiques the existing categorisations for Indonesian Islam and points to their inadequacy when describing the PKS and the campus-based Tarbiyah movement from which it sprang. He reworks the santri typology, dividing it into convergent, radical and global substreams. This offers new possibilities for explaining the PKS phenomenon and assists in differentiating between various types of Islamic revivalism in contemporary Indonesia. It also allows a more understanding of the accommodatory stance which PKS has towards the state and other political forces. Yon's text provides a good overview of the development of PKS from its Tarbiyah movement origins to its impressive success at the 2004 general elections. It considers the party's attitude towards the issues of sharia implementation and community welfare and closes by examining the future challenges facing PKS. It is a well written and authoritative account from a scholar who has done wide-ranging research on the party.

'Extraordinary... A fascinating and intelligent book.' Sunday Times New islands are being built at an unprecedented rate whether for tourism or territorial ambition, while many islands are disappearing or fragmenting because of rising sea levels. It is a strange planetary spectacle, creating an ever-changing map which even Google Earth struggles to keep pace with. In The Age of Islands, explorer and geographer Alastair Bonnett takes the reader on a compelling and thought-provoking tour of the world's newest, most fragile and beautiful islands and reveals what, he argues, is one of the great dramas of our time. From a 'crannog', an ancient artificial island in a Scottish loch, to the militarized artificial islands China is building in the South China Sea; from the disappearing islands that remain the home of native Central Americans to the ritzy new islands of Dubai; from Hong Kong and the Isles of Scilly to islands far away and near: all have urgent stories to tell.

Answers To Non Muslims Common Questions About Islam

Religious broadcasting in the Middle East has benefited tremendously from new transnational media networks and the widespread availability of satellite broadcasting technology. Dozens of Muslim, Christian, and Jewish religious channels are now on air, advocating different forms of religiosity and shaping public perceptions through dialogue and debate. Mainstream news channels, such as Al-Jazeera and Al-Arabiya, broadcast popular religious programming, in some cases filled with highly politicized content. Others feature more apolitical commentary and are concerned only with preaching God's word. The Middle East's highly-charged religious and political ferment has certainly been propitious for such broadcasters as they seek to convey their message. This has, in turn, reinforced the link between the dominant "religious atmosphere" and religious broadcasting. Monitoring the content-analysis of some of the region's most influential religious channels and programs, the contributors to this volume provide pioneering insights into the Middle East's burgeoning religious media market. They explore the themes, discourses, appearances, and "celebrities" of this rapidly expanding phenomenon and how its complex dynamics have transformed the region and the world.

With this new activity, she makes new friends, faces new challenges and exposing herself to her own native culture that she has never known before. Join Vina to know more about the Betawi Culture!
